

GRAVITATIONAL ENERGY CORPORATION

For The Betterment of Mankind

Introducing Gravity Assisted Power

Drinking from a mud puddle. Crazy?

Nearly a billion people in the developing world do it every day. This puddle, or a small pond, creek or river is their only source for drinking water. And because this water is untreated, **millions get sick and die each year from water-born illnesses.**

“Water-wise, the world is in a state of crisis. More people die and suffer from the lack of access to safe drinking water and to basic sanitation, than from war.” Source; [U.N.-Water and The United Nations Secretary-General’s Advisory Board on Water and Sanitation.](#)

That’s why, since 2004, the **Gravitational Energy Corporation has been researching and developing a new technology;** that **hand-operated** can pump water through a filtration system transforming it into safe, drinkable water, ending the unnecessary loss of life due to contaminated water.

GP210 pictured with optional trailer and Aquathin water filters.

It’s a perfect example of how we approach our work: identify specific problems where focused, low-cost solutions can yield big results.

There is an answer to every problem, but some answers are truly sustainable. That’s where we concentrate our efforts.

To prove **our new technology works**, a hand-operated water pump was donated to earthquake-stricken Haiti. It is equipped with two water filtration systems, also **manufactured in America**, by Aquathin Corp. **This complete water treatment facility is operated a mere three hours a day, yet yields drinking water for some 4,000 people.**

It’s a small example of what this new technology can accomplish – providing a better way of life through safe drinking water.

With your help, our innovative technology will help improve the health and well being of individuals in our world’s developing communities through good, safe drinking water.

With its small cost, under \$13,000^{*}, this pump will be a big investment in the many lives with a simple need – life sustaining clean water.

For purchasing information, contact Gravitational Energy Corporation at GEC@gravityassistedpower.com, or call 330-920-6222.

^{*} For GP210 water pump/pendulum only. Add for optional water filtration systems and mounting options.
